PROFESSIONAL SUMMARY

Infrastructure and Production Support professional with nearly 3 years of experience at HCL Technologies supporting physical and virtual infrastructure in production environments. Experienced in 24x7 infrastructure monitoring, Incident Management, Change Management, Critical Incident Management, SLA-driven operations, and stakeholder communication. Hands-on experience with Moogsoft monitoring, ServiceNow, capacity planning, health checks, performance tuning, backup and disaster recovery, security compliance, and operational documentation. Strong ability to troubleshoot production issues, coordinate P1/P2 incidents, streamline escalation workflows, and maintain reliable IT infrastructure.

CORE COMPETENCIES

Infrastructure Operations: Physical Infrastructure, Virtual Infrastructure, Production Support, Infrastructure Monitoring, System Health Checks

IT Service Management: Incident Management, Change Management, Critical Incident Management, Problem Resolution, SLA Management, Escalation Management

Monitoring & Operations: Moogsoft, 24x7 Monitoring, Event Correlation, Incident Detection, Alert Management, Performance Monitoring

Business Continuity: Backup and Disaster Recovery, Capacity Planning, Performance Tuning, Availability Management

Security & Compliance: Security Policies, Compliance Management, Risk Management, Audit Support, Access Controls

ITSM Tools: ServiceNow, Moogsoft

Professional Skills: Stakeholder Communication, Technical Documentation, Troubleshooting, Cross-functional Collaboration, Customer Support

PROFESSIONAL EXPERIENCE

HCL Technologies

Sep 2023 – Present

Infrastructure Support / Production Support

India

- Administer and support physical and virtual infrastructure environments for enterprise clients, maintaining high availability and operational efficiency across production environments.
- Perform 24x7 production monitoring using Moogsoft for event correlation, alert monitoring, incident detection, and timely escalation of infrastructure issues.
- Participate in the Critical Incident Management (CIM) process for P1/P2 incidents, coordinating bridge calls, tracking incident updates, and communicating real-time status to stakeholders.
- Support Change Management activities by assessing implementation risks, coordinating planned changes, and helping minimize disruption to production services.
- Manage incident escalation and response workflows to support strict SLA requirements and reduce potential business impact from infrastructure incidents.
- Perform infrastructure health checks, capacity planning, and performance monitoring to identify potential issues and support reliable production operations.

- Troubleshoot infrastructure incidents and coordinate with relevant technical teams to identify the appropriate resolution path and restore services within agreed SLAs.
- Support backup and disaster recovery activities to improve business continuity and operational resilience.
- Maintain compliance with internal security policies and industry requirements while supporting audit activities and risk management processes.
- Create and maintain technical documentation covering infrastructure configurations, incident records, operational procedures, and troubleshooting activities.
- Maintain customer-focused communication throughout incident resolution and provide timely updates to relevant stakeholders.
- Create and manage incidents generated through infrastructure monitoring workflows, ensuring appropriate categorization, assignment, escalation, and tracking.

KEY ACHIEVEMENTS

- Supported 24x7 production infrastructure monitoring, enabling early detection and escalation of issues affecting enterprise services.
- Contributed to P1/P2 Critical Incident Management, coordinating incident bridges and maintaining real-time communication with technical teams and stakeholders.
- Supported SLA-driven incident and escalation processes to ensure timely response and resolution of production issues.
- Used Moogsoft event correlation and monitoring capabilities to improve identification and handling of infrastructure alerts.
- Contributed to infrastructure reliability through proactive health checks, capacity planning, performance monitoring, backup, and disaster recovery activities.

EDUCATION

Master of Computer Applications (MCA) Indira Gandhi National Open University (IGNOU) <i>Pursuing</i>	2024 – 2026
Bachelor of Computer Applications (BCA) Rajarshi School of Management and Technology	2019 – 2022
Intermediate (12th) Ram Lakhan Public School, Varanasi	2018 – 2019
High School (10th) St. Joseph's School, Varanasi	2016 – 2017

ACADEMIC PROJECT

Canteen Management System	2021 – 2022
• Developed an academic application concept covering menu management, order processing, billing, and report generation. • Designed workflows for inventory management and financial reporting. • Incorporated data security and error-handling considerations into the application design.	

CERTIFICATIONS

- Fundamentals of Programming Languages – Mind Luster, Sep 2023
- Analyze Your Data and Answer Your Questions – Mind Luster, Sep 2023

LEADERSHIP EXPERIENCE

Management Head

Jun 2021 – Jun 2022

Rajarshi School of Management and Technology

- Led planning and execution of the fresher's event for incoming students.
- Coordinated event activities, team members, logistics, and participant communication.
- Demonstrated leadership, teamwork, organization, and communication skills while managing event execution.
